

## Playing Music in the Hall via Bluetooth

**The following procedure should be supervised by a member of staff or a member of the committee.**

### **Set Up**

Plug in and switch on the Yamaha Amp at the wall socket. (The Amp is in the wooden box mounted on the wall above the emergency exit.)

Open the front door of the wooden box. It can be reached by standing on a chair. If this is locked you will need to get the key ! Policy on locking has yet to be decided.

Get hold of the Yamaha Remote Control. This doesn't have a permanent home yet. It is currently with the Film Club projector.

Turn on the Amp with the Remote Control.

Use the "Input" keys on the Remote control to cycle through until "Bluetooth" appears on the screen.

### **The Hirer should then.....**

Look for "RX-V581 DD525B Bluetooth" on their Bluetooth Device (e.g. Smartphone or Laptop) and connect.

Play the audio source on their Bluetooth device.

Staff can then use the Remote Control to change the volume.

### **Shut Down**

Power off the Amp with the Remote Control.

Switch off the Amp at the mains.

Put the Remote Control back where you found it !

If the Amp box was locked then lock it up and return the key to where you found it. Otherwise just close the door.
